EXPERIENCE

Calrom, Lahore — *Lead .Net Developer*

Mar 2024 - Present

Worked as **Lead .Net Developer** on **GNG (Group Next Gen)**, a group ticket booking airline system. I led a team of developers and worked on the development and enhancement of the GNG, focusing on self-service policy management. I was also responsible for updating the existing ticketing robot project to integrate Hangfire for more efficient handling of background jobs. Additionally, I implemented the functional and unit tests using NUnit and MoQ. Also, I integrated messaging queues using RabbitMQ, along with MassTransit, in Groups-Authentication and GNG projects to streamline communication. I also provided continuous mentoring and training to junior developers, helping them strengthen their coding abilities and guiding them through the development process.

Articheck, Remote — *Lead Developer*

Dec 2022 - Mar 2024

Worked as **Lead Developer** on **Articheck** and managed a team of developers to leverage the application's capabilities to effortlessly add and annotate images, integrate it with the existing database for workflow simplification and standardization approach by enhanced efficiency and speeding the process from initiation to completion. Conducted weekly sprints, documented business processes, prioritizing defects, managing ticket backlogs for dev team, collaborated with QA to update requirement and scope.

TekHQS, Lahore — *Principal .Net Engineer*

Mar 2022 - Dec 2022

Worked as **Principal .Net Engineer** on **LoadStop**, a fully integrated truck management application. Developed simplified load dispatch, LTL trip management/consolidation, manage load accessories and documents, and batch settlements (company, owner, partner). Collaborated with QA for bug fixing, requirement gathering and testing.

AutoSoft Dynamics (Pvt) Ltd, Lahore — *Principal Software Engineer*

May 2013 - Mar 2022

Started as **.Net Developer** on **AutoTMS**, a bug-tracking and ticketing management system (Web/Desktop). Developed user accounts, roles allocation, users team mapping, client project mapping, project module mapping, project user mapping, impact analysis, task escalation and SLA severity priority mapping. Made SOAP-based Web Services for AutoTMS to be integrated into other projects. Perform optimization by minifying scripts, reducing time load and increasing response time.

Next, worked as a **Software Engineer** on **BESS**, a tool used for specially designated nationals and blocked person list (SDN List) and other sanction lists. Implemented banned entities, fuzzy logic searching, and data extraction in .xls and .pdf.

Next, worked as a **Senior Software Engineer** on **AutoCOMPLIANCE**, a financial crime compliance service featuring central data processing and a suspicious behavior identification engine. Implemented rule based transaction definition and alert generation, adding/updating/deleting rules, and transaction analysis.

Next product was **AutoWEB**, a web-based platform that allowed customers to execute financial transactions. Played a key role in the implementation of electronic bill payments against BroadBand & Telecom, Mobile and Utilities, fund transfer using IBFT/Own/Other/Salary accounts, blocking/unblocking of cards/cheque books, requests for loan/pay order, card/cheque book, email/notification/queues/company/bank management and various other modules.

Next, worked as **Principal Software Engineer** on **AutoMobile** a customer-centric financial transaction mobile app. Implemented fund transfers (IBFT/Own/Other), bill payments, mobile top-up, transaction statement/history, authentication (token & finger), password/beneficiaries/branch/profile management, Email/SMS API integration. Documented design specification, functional/non-functional requirements and architectural design.

SKILLS

Agile, Scrum, Task/Resource Management, DevOPS

Microservices, SOLID Principles, Clean Architecture, Repository/Architectural Patterns

FinTech, API/Third Party Integration

TECHNOLOGY STACK

.Net MVC/Core/Boilerplate, Azure Functions/Storage, EF/EF Core, WCF, WebAPI, WebForms, WinForms, WPF, LINQ, JSON, AJAX, AutoMapper, Soap/Rest API, NUnit and Moq, RabbitMQ/MassTransit, Hangfire, CQRS

Xamarin (Cross Platform)

JS/TS, Angular 14/15, Angular Material, React, Bootstrap, JQuery, HTML 5, CSS 3

SQL Server, PostgreSQL

VERSION CONTROL

VSS, Git

EDUCATION

MS Computer Science, Virtual University of Pakistan

LANGUAGES

English, Urdu
